

## Welcome

**London Network Scaffolding Ltd** have been involved with several prestige and specialised projects, working on some of London's most iconic building's.

The business is recognised for it's professional and quality driven approach which is an asset when working on these types of contracts.

## Tower of London

**London Network Scaffolding Ltd** recently carried out works at one of London's most recognisable tourist attractions; The Tower of London. The scaffold was erected so that the contractor could carry out stone works, roof repairs and replacement.

**PAYE (Historic Facades)** had already contracted a scaffolding company to carry out the erection of various Haki temporary roofs at the site. However, the company didn't have the knowledge of how to erect this sort of temporary roof so we were contracted.

The business is recognised for it's professional and quality driven approach which is an asset when working on these types of contracts.

## Syon House

London Network Scaffolding Ltd have recently carried out works at Syon House, Osterley for Historic Property Restoration Ltd. The works involved the complete re-covering of the west wing roof in sand cast lead, structural timber repairs to the roof carcasing, the complete renewal of the crenellated parapets to the West, North and South elevations, extensive stone cleaning, repointing and chimney repairs.

The Phase 1 works were completed two weeks ahead of programme to allow an important wedding to take place at the house.
